SEE

Future Stars Secondary English School

2017/04 – 2019/04

Itahari-9, Nepal

Skills

Technical Skills

Programmng Language: HTML, CSS, Javascript, Java, Python

Framework:- Flutter, React, Node

Databases:- MySQL, MongoDB, Firebase

Application:- VS Code, Eclipse, GitHub, Figma, Arduino IDE, Android Studio, MS Word

Soft skills

Teamwork

Collaboration

Optimistic

Problem solving

Hardworking

Certificates

React.js Essential Training

April 2023

React.js Building an Interface

April 2023

Node.js Essential Training

April 2023

Learning npm: a package manager

April 2023

Learning Node.js

April 2023

Learning Git and GitHub

March 2023

Projects

Basic E-commerce Website for Food

React, Node(Express), MongoDB

In the project the admin can add the product and the user can only register, login, view products and add the products to cart.

Basic CRUD Project

React.js, Node.js (Express), MongoDB

The project is a simple CRUD project where user can register, view the registered users, update the information and delete the user.

Cab booking project [↗](#)

Flutter and Firebase

Using the application, a signed up customer can select the destination place and the pickup location will be the current location of the customer. The customer can book a cab and can cancel the book request as well. The firebase is used as a backend.

E-commerce Clothe Website

HTML, CSS, Javascript, Java, Xampp

Using the application, the admin can add the clothes which will be displayed on the products page to the customer. The signed in customer can order the product or add the product on the cart. The admin can view orders and manage the customers, products and can view the report of customers, orders and products.

Clothe selling system

Python

In the project, the details of clothes are fetched from the txt file and shown to the customer where the customer selects the clothes and orders certain quantity of clothes. The quantity of clothes change on txt file accordingly. And the required validation are also done.

Frontend for Mobile selling website

HTML, CSS, Javascript

This is the frontend design of the e-commerce website of mobile.

Smart Dustbin with remote control

Cloud Computing and IOT

The project consists of dustbin where the dustbin can be moved using remote device linked to the dustbin. The lid of the dustbin opens on itself while detecting an object near it. And after disposal of waste it closes itself. The level of dustbin can also tracked using website and internet.
